DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a thin film magnetic memory device having all exclusive limitations as recited in claims 1 and 7, comprising first and second magnetic memory cells, first and second conductors, which are parallel to each other and which intersects the respective cell, for applying a magnetic field to the respective cell, and a magnetic film filling the space between the first and second conductors. In particular, the prior art of record discloses filling the space between the conductors with an insulating layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copies of the references are not being furnished with this Office Action per MPEP § 707.05(a).

a) U.S. Patent 6,174,737 to Durlam et al. discloses a memory structure similar to that by Chen et al. (prior art cited by Applicant).

b) U.S. Patent 6,560,135 to Matsuoka et al. discloses a memory structure having, for each cell, two word lines and a data line, the data line being sandwiched between the two word lines.
